- calender sync
- evaluation sync

AI MEAL SCAN

- perso info Based
- ai meal balance to meet objective
- compte rendu carbs ,prot,fibers

auth /sign in sign up

- *name*
- *surname*
- *Username*
- *age*
- *adresse mail*
- *gender*
- *phone number*
  *profile picture *op**

Health info

- *height*
- *weight*
- *objectives to choose from bulking,slimming ,etc …*
- *type of diet to choose from antiinf*
  gym attendance frequency
  -a feature AI recipes generator based on all the data above

rewarding system

- *body scan progress tracker AI premium*
- *mini red flame streak per session/ big flame streak per weekly finished sessions*

🎨 *UX / UI DESIGN SPECIFICATION*

Project: *TwinFit (working title)*
Type: *Mobile App (iOS & Android)*
Positioning: *Social challenge & consistency app (Strava x Duolingo vibe, not fitness-heavy)*

---

1. PRODUCT PHILOSOPHY (READ FIRST)

Core Idea

*TwinFit is **not a fitness tracking app**.*
*It is a **social challenge app** where consistency, visibility, and identity drive engagement.*

Emotional Goals

The UI must make the user feel:

- *Supported, not judged*
- *Proud, not pressured*
- *Challenged, not compared aggressively*

Design Keywords

Clean · Calm · Motivating · Social · Identity-driven · Premium but friendly

---

2. TARGET USER

- *Age: 18–40*
- *Gym-goers (casual to regular)*
- *Comfortable with social apps*
- *Likes sharing progress (Strava / Duolingo style)*

---

3. GLOBAL UI RULES (VERY IMPORTANT)

Layout

- *One primary action per screen*
- *No dashboard overload*
- *Plenty of white/negative space*

Typography

- *Clear, modern sans-serif*
- *Hierarchy must be obvious*
- *Avoid small text for key actions*

Colors

- *Base palette: neutral / dark / calm*
- *Accent color used ONLY for:*
    - *streaks*
    - *flames*
    - *borders*
    - *rewards*

Animations

- *Subtle*
- *Meaningful*
- *Reward-oriented (never decorative)*

---

4. PROFILE SYSTEM (CORE IDENTITY MECHANIC)

4.1 Avatar / Profile Picture

*The **profile avatar is the visual anchor of the entire app**.*

Avatar Options

- *User can:*
    - *Upload a personal photo*
    - *OR choose from a predefined avatar gallery*

Avatar Gallery

- *Grid layout*
- *Categories:*
    - *Sporty*
    - *Minimal*
    - *Fun*
    - *Neutral / gender-free*
- *Avatars are:*
    - *Clean*
    - *Flat or semi-illustrated*
    - *Neutral expressions*

UX Copy:
“Choose how you want to be represented.”

4.2 Streak Border (Primary Reward)

*The avatar is surrounded by a **dynamic border**.*

Border Evolution

- *Level 1: Simple thin border (starter)*
- *Level 2: Colored border (consistency)*
- *Level 3: Gradient / animated border (high streak)*
- *Level 4: Premium animated border (long-term streak)*

Rules

- *Border reflects ONLY streak consistency*
- *No numbers shown on the border*
- *Border is always visible in:*
    - *Profile*
    - *Duo / Squad view*
    - *Social shares*

4.3 Secondary Badges (Milestones)

Badge Placement

- *Small icons around or under avatar*
- *Max 3 visible at a time*
- *Others accessible via “View all”*

Badge Style

- *Minimal icon*
- *Flat or semi-flat*
- *Single accent color*

---

5. MILESTONE BADGES (SECONDARY ACHIEVEMENTS)

Badge Categories (Designer should iconify each)

🌍 ***Exploration***

- *Train in another country*
- *Train in a new city*

⏱️ ***Engagement***

- *Extra session beyond weekly goal*
- *Early workout*
- *Late workout*

🔥 ***Consistency***

- *Perfect week*
- *Streak recovery*

🤝 ***Social***

- *Squad anchor (last to validate)*
- *Motivator (streak saved by user presence)*

UX Behavior

- *Badges are:*
  - *Hidden by default*
  - *Revealed as surprises*
- *Unlock animation:*
  - *Light pulse*
  - *Confetti (very subtle)*

Copy Example:
"Milestone unlocked ✨"

---

6. HOME / WELCOME SCREEN (MOST IMPORTANT SCREEN)

Screen Hierarchy (Top → Bottom)

1️⃣ ***Header***

- *Avatar with streak border*
- *Flame count (icon only, no big numbers)*

2️⃣ ***PRIMARY ACTION — Gym Check-In***

- *Large button*

- *Camera icon*
- *Text: “Check in at the gym”*

3️⃣ Group Sync Status

- *Avatars of duo / squad members*
- *Visual indicators:*
    - *Checked in*
    - *Pending*

4️⃣ AI MEAL FEATURES (SECONDARY CARD)

*Placed **below** check-in area.*

- *Compact card*
- *Text:*
  “Just trained?
  Check your meal balance.”

CTA:

- *“Scan meal”*
- *“Generate recipe”*

*Must feel **optional**, never urgent.*

---

7. STREAK SYSTEM VISUALS

Mini Flame

- *Appears after each session*
- *Small animation*
- *Non-intrusive*

Big Flame (Weekly)

- *Larger animation*
- *Stronger color*
- *Triggered only once per week*

---

8. AI MEAL SCAN SCREEN

Layout

- *Photo preview on top*
- *Results below*

Results Style

- *Bars or circles for:*
    - *Protein*
    - *Carbs*
    - *Fibers*
- *No percentages*
- *No “good / bad”*

Tone example:
“This meal supports your goal fairly well.”

---

9. AI RECIPE GENERATOR SCREEN

Input

- *Ingredient chips / tags*
- *Manual input allowed*

Output

- *Card layout*
- *Recipe name*
- *Steps (short)*
- *Optional “Save” button*

Design must feel:

- *Friendly*
- *Calm*
- *Not clinical*

---

10. SOCIAL SHARING SCREENS

Shareable Visual

Must include:

- *Avatar*
- *Border*

- *Badge or flame*
- *Short message*

Style

- *Square (Instagram friendly)*
- *Minimal text*
- *Strong identity*

---

11. PREMIUM FEATURES VISUAL RULE

Premium features:

- *Visible*
- *Slightly blurred or locked*
- *Clear “Premium” tag*
- *Never aggressive upsell*

---

12. WHAT THE DESIGN MUST AVOID (CRITICAL)

❌ *Fitness dashboards*
❌ *Calorie obsession*
❌ *Aggressive charts*
❌ *Comparison tables*
❌ *Shame-based copy*

---

13. DELIVERABLES EXPECTED FROM DESIGNER

- *Full onboarding flow*
- *Avatar gallery*
- *Profile states (all border levels)*
- *Home screen states*
- *Badge unlock animation concept*
- *Social share templates*
- *Dark & light mode (if possible)*

FINAL NOTE FOR DESIGNER

This product lives or dies by:

- *emotional subtlety*
- *identity clarity*
- *reward visibility*

Less UI is better UI.

🧭 USER EXPERIENCE — VERSION FINALE (UPDATED)

🎯 Promesse ressentie par l'utilisateur

> *"Cette app me donne envie d'être constant, parce que les autres le voient."*
> *Ce n'est pas une app fitness.*
> *C'est une app de challenge social & d'identité.*

1️⃣ PREMIÈRE OUVERTURE DE L'APP

🎬 Splash / Intro

L'utilisateur ouvre l'app.

Message clair, court :

> *"Challenge each other. Stay consistent."*

Deux boutons :

- *Sign up*
- *Log in*

➡️ *L'utilisateur comprend immédiatement :*

- *il va jouer*
- *il va être vu*
- *la constance est le cœur du jeu*

2️⃣ SIGN UP & PROFIL DE BASE

L'utilisateur crée son compte.

Infos demandées (sans surcharge) :

- *Name*
- *Surname*
- *Username*
- *Email*

- *Phone number*
- *Password*

Puis :

- *Age*
- *Gender*

➡️ *Copy rassurante :*

> *“You can update this anytime.”*

3️⃣ *AVATAR SELECTION (ÉTAPE CLÉ)*

Avant toute chose, l’utilisateur arrive sur :

🎭 *“Choose your identity”*

Deux options très visibles :

- *Upload a photo*
- *Choose an avatar*

🖼️ *Avatar Gallery*

- *Petite galerie stylée*
- *Avatars :*
  - *sporty*
  - *minimal*
  - *fun*
  - *neutral / gender-free*

➡️ *L’utilisateur choisit un avatar qui lui ressemble sans se sentir exposé.*

Message :

> *“This avatar will represent your progress.”*

👉 *À ce moment-là, l’identité est posée.*

4️⃣ *CHOIX DU MODE DE CHALLENGE*

L’utilisateur choisit comment il veut jouer :

- ❤️ *Couple Mode → 2 personnes*

- 🤝 *Besties Mode → 2 personnes*
- 👥 *Squad Mode → 4 personnes*

Chaque mode a une micro-description :

- *Couple → engagement fort*
- *Besties → motivation mutuelle*
- *Squad → challenge collectif*

➡️ *Branding ressenti :*

> *"My consistency affects others."*

5️⃣ *INVITATION & SYNC DU GROUPE*

L'utilisateur invite :

- *1 personne (Couple / Besties)*
- *jusqu'à 3 personnes (Squad)*

Tant que le groupe n'est pas complet :

- *streak inactive*
- *accès limité*

Message doux :

> *"Your challenge starts when your team is complete."*

6️⃣ *HEALTH & GOALS SETUP (POUR LES IA)*

Une fois le groupe formé, l'app demande :

🧠 *Health info*

- *Height*
- *Weight*
- *Gym attendance frequency*

🎯 *Objective*

- *Bulking*
- *Slimming*
- *Maintenance*

- *Wellness / anti-inflammatory*

🥗 *Diet type*

- *Anti-inflammatory*
- *Balanced*
- *High-protein*
- *No preference*

➡️ *Ton UX important :*

> *“This helps us personalize your experience. No pressure.”*

7️⃣ *HOME / WELCOME SCREEN (CŒUR DE L’APP)*

C’est l’écran quotidien.

🔝 *HEADER — IDENTITÉ VISUELLE*

- *Avatar choisi*
- *Bordure de constance autour de l’avatar*
- *Icône 🔥 indiquant la streak (sans chiffres agressifs)*

➡️ *L’utilisateur voit immédiatement son statut.*

🏋️ *ACTION PRINCIPALE — GYM CHECK-IN*

- *Gros bouton : “Check in at the gym”*
- *L’utilisateur prend une photo*

L’IA :

- *valide la présence*
- *synchronise avec le groupe*

Quand tout le monde a validé :

- *animation collective*
- *🔥 Mini flame streak attribuée*

Message :

> *“Session completed. Streak secured.”*

📅 *LOGIQUE DE STREAK*

- *Chaque session = mini flame*
- *Objectif hebdomadaire atteint →*
  🔥🔥 Big flame weekly

➡️ *En Squad mode :*

- *chacun voit qui a validé*
- *pression positive*
- *aucune humiliation*

8️⃣ *RÉCOMPENSES VISUELLES (IDENTITÉ)*

🥇 *Bordure = récompense principale*

La bordure autour de l'avatar évolue automatiquement avec la streak.

➡️ *L'utilisateur sent :*

> *"Ma constance est visible."*

🧩 *BADGES SECONDAIRES (MILESTONES)*

Sans prévenir, après certaines actions :

🎉 *"Milestone unlocked ✨"*

Exemples :

- 🌍 *Entraînement dans un autre pays*
- ⏱️ *Séance bonus au-delà de l'objectif*
- 🤝 *Dernier à valider pour sauver le groupe*

Les badges :

- *apparaissent autour / sous l'avatar*
- *racontent une histoire personnelle*
- *n'affectent pas la streak*

9️⃣ *AI MEAL SCAN (OPTIONNEL, AWARENESS)*

Sous la zone check-in :

📸 *Scan meal*

L'utilisateur prend une photo de son plat.

L'IA affiche :

- ***équilibre global***
- ***adéquation à l'objectif***
- ***carbs / proteins / fibers (visuel doux)***

Message :

> ***"This meal supports your goal fairly well."***

➡️ ***Aucun chiffre brutal. Aucun jugement.***

🔟 *AI RECIPES GENERATOR (PERSONNALISÉ)*

L'utilisateur entre :

- ***les ingrédients qu'il a***

L'IA utilise :

- ***health data***
- ***objectif***
- ***diet***
- ***fréquence gym***
- ***jour d'entraînement***

Résultat :

- ***recettes adaptées***
- ***simples***
- ***cohérentes avec son rythme***

➡️ ***Sensation :***

> ***"The app understands my lifestyle."***

1️⃣1️⃣ PARTAGE SOCIAL (MOTEUR DE CROISSANCE)

À chaque moment clé :

- ***big flame***
- ***badge rare***
- ***évolution de bordure***

L'utilisateur peut partager :

- ***avatar***
- ***bordure***
- ***badge***
- ***message court***

Style :

- ***clean***
- ***fier***
- ***inspirant***
  ➡️ ***Strava / Duolingo energy***

1️⃣2️⃣ AI BODY SCAN (PREMIUM)

Optionnel.

- ***comparaison visuelle dans le temps***
- ***focus progression***
- ***jamais de score violent***

Message :

> ***"Progress is not perfection."***

🔁 RITUEL QUOTIDIEN FINAL

Chaque jour :

1. ***Ouvrir l'app***
2. ***Voir son avatar & sa bordure***
3. ***Check-in gym***
4. ***Voir le groupe***
5. ***(Optionnel) nutrition / recettes***
6. ***Ressentir fierté & challenge***

🎯 *CE QUE L'UTILISATEUR RETIENT*

- ***Il joue à être constant***
- ***Son effort est visible socialement***
- ***Son identité évolue***
- ***Les autres le motivent sans le juger***

👉 ***C'est une app de discipline sociale.***

🧠 MASTER FIGMA PROMPT — TWINFIT (FULL UX/UI GENERATION)

You are a senior iOS product designer and motion-aware UX architect.

Design a **complete mobile app UX/UI system** for an iOS application called **TwinFit** (working title).

TwinFit is a **social challenge & consistency app**, not a traditional fitness tracker.
The core idea is **challenging each other through visible consistency**, inspired by **Strava and Duolingo**, but focused on gym attendance and lifestyle habits.

---

1. DESIGN PHILOSOPHY

- The app must feel **calm, premium, social, and motivating**
- No aggressive fitness dashboards
- No calorie obsession
- No judgmental visuals
- Progress must feel **earned, visible, and identity-based**

Keywords:
Minimal · Social · Identity · Consistency · Reward-driven · iOS-native

---

2. CORE USER MODES

Design flows for:

- **Couple Mode** → 2 users
- **Besties Mode** → 2 users
- **Squad Mode** → 4 users

These are **challenge modes**, not relationship modes.

---

3. ONBOARDING FLOW (SCREENS REQUIRED)

Create the full onboarding flow with the following screens:

3.1 Welcome / Intro

- Short tagline: “Challenge each other. Stay consistent.”
- CTA: Sign up / Log in

3.2 Sign Up

Fields:

- Name
- Surname
- Username
- Email
- Phone number
- Password
- Age
- Gender

Keep the UI light and progressive (not all fields on one screen).

---

4. AVATAR & IDENTITY SYSTEM (VERY IMPORTANT)

The profile avatar is the **visual core of the app**.

4.1 Avatar Selection Screen

- User can upload a photo OR choose an avatar
- Include a **gallery of predefined avatars**
- Avatar styles:
    - Sporty
    - Minimal
    - Fun
    - Neutral / gender-free

Copy example:
“Choose how you want to be represented.”

---

5. STREAK & REWARD VISUAL SYSTEM

5.1 Streak Border (Primary Reward)

Design an avatar with a **dynamic border** that evolves based on streak consistency:

- Basic border → beginner
- Colored border → consistent
- Gradient or animated border → high streak
- Premium animated border → long-term consistency

No numbers on the border.
The border itself is the reward.

5.2 Secondary Badges (Milestones)

Design small collectible badges that appear around or under the avatar.

Badge categories:

- 🌍 Exploration (training in another country / city)
- ⏱️ Engagement (extra workout beyond weekly goal)
- 🔥 Consistency (perfect week, streak recovery)
- 🤝 Social (saving the squad streak, last to check in)

Badges should:

- Be hidden by default
- Unlock as surprises
- Never affect the main streak

---

6. GROUP SETUP FLOW

Design a flow where users:

- Choose challenge mode (Couple / Besties / Squad)
- Invite members via link or code
- See a “group incomplete” waiting state

Copy example:
“Your challenge starts when your team is complete.”

---

7. HEALTH & GOALS SETUP

Screens to collect:

- Height
- Weight
- Gym attendance frequency
- Objective (Bulking / Slimming / Maintenance / Wellness)
- Diet preference (Anti-inflammatory / Balanced / High-protein / None)

Tone must feel optional and non-medical.

---

8. HOME / WELCOME SCREEN (CORE SCREEN)

Design the main daily screen with this hierarchy:

Header

- Avatar with streak border
- Flame icon (streak indicator, no numbers)

Primary Action

- Large “Check in at the gym” button
- Camera-first interaction

Group Sync Section

- Avatars of duo / squad members
- Visual states: pending / completed

Secondary Card (Below)

- AI Meal Scan
- AI Recipe Generator

These must feel **optional**, not mandatory.

---

9. STREAK LOGIC VISUALS

- Mini flame for each session
- Big flame animation for weekly completion
- Group celebration when all members complete

Animations must be subtle, rewarding, and iOS-native.

---

10. AI MEAL SCAN SCREEN

Design a screen where:

- User takes a photo of a meal
- AI estimates:
    - Meal balance
    - Alignment with objective
    - Carbs / Proteins / Fibers (visual bars, not aggressive numbers)

Include a disclaimer:
“Estimation based on image. For awareness only.”

---

11. AI RECIPE GENERATOR SCREEN

- Ingredient input via text or chips
- Recipe cards as output
- Calm, friendly UI
- Save / regenerate options

---

12. SOCIAL SHARING SCREENS

Design shareable cards (Strava / Duolingo style) that include:

- Avatar
- Streak border
- Badge or flame
- Short motivational copy

Optimized for Instagram stories and posts.

---

13. PREMIUM FEATURES

Design locked premium states for:

- AI body scan progress tracker

Use:

- Blur
- Lock icon

- Soft upsell

Never aggressive.

---

14. MOTION & INTERACTION GUIDELINES

- iOS-native easing and transitions
- Subtle haptics for:
    - Check-in success
    - Weekly streak completion
    - Badge unlock

No excessive animations.

---

15. DELIVERABLES

Generate:

- Full onboarding flow
- Home screen states
- Profile & avatar states
- Streak & badge states
- AI screens
- Social share templates
- Light & dark mode if possible

The final result should feel **simple, social, premium, and emotionally motivating**.

Design as if this product's success depends on **retention, identity, and pride**, not raw fitness data.
